EXECUTIVE CONTENT WORKSHOP

LANA CONTENT COMMAND CENTER

Plan, draft, approve, and repurpose a week of high-trust content without losing your voice.

PILLARS

RHYTHM

VOICE

APPROVE

REPURPOSE

One week. One source. One coordinated publishing system.

A practical 90-minute workshop for founders and small teams.

01**Define Your Content Pillars**

18 min

Choose the recurring conversations your brand should lead, then create an evidence-rich bank of ideas inside each pillar.

02**Create a Weekly Publishing Rhythm**

18 min

Give every publishing day a purpose and connect the work through one simple production board.

03**Draft Without Sounding Generic**

20 min

Capture the founder's natural voice and use a structured drafting brief that gives AI real source material, boundaries, and intent.

04**Review and Approve**

17 min

Separate drafting from approval, use a five-pass editorial review, and define the lane every asset follows before publication.

05**Repurpose into Video and Email**

17 min

Translate the approved idea into channel-native video and email while preserving the original insight and voice.

FINAL BUILD

A complete one-week Content Command Center containing a three-pillar strategy, a 15-idea bank, a weekly publishing board, one approved anchor post, a short-form video script, an email draft, and a documented review and approval workflow.

What learners will build

Every exercise creates an asset for the final Content Command Center.

Define three durable content pillars tied to audience needs and business goals.

Apply a repeatable human review and approval process before publication.

Build a realistic weekly publishing rhythm with a clear job for each content touchpoint.

Translate one approved idea into a short-form video and an email without simple copy-and-paste repetition.

Create specific, evidence-rich drafts that retain the founder's natural voice.

Leave with a ready-to-use one-week Content Command Center.

Human approval stays in the loop

Protect source material, claims, rights, privacy, and audience trust.

- Do not paste confidential customer information, private conversations, contracts, credentials, health information, financial details, or unpublished strategy into a public AI tool.
- Use summaries, redacted examples, or approved enterprise/private systems when sensitive context is required.
- Verify names, dates, numbers, quotations, claims, links, and source attributions before publication.
- Keep a human approval gate for every customer-facing post, video, newsletter, or automated message.
- Do not imitate another creator's distinctive voice or reproduce protected content without permission.
- Use only photographs, music, screenshots, testimonials, and brand assets you have the right to publish.
- Avoid presenting generated examples, composite stories, or hypothetical results as real customer evidence.
- Make captions, transcripts, readable contrast, descriptive links, and alt text part of the publishing workflow.

Publish only when the source, rights, reviewer, approver, and response path are clear.

Build as you learn

Each module advances one approved anchor idea.

FACILITATOR MOVE

Keep the learner working on one real audience, one source-backed idea, and one current week.

DEFINE YOUR CONTENT PILLARS

A three-pillar strategy with clear purpose, boundaries, proof sources, and at least fifteen usable ideas.

FACILITATOR FOCUS

Choose durable conversations and source-backed ideas.

LANA PILLAR FIT MAP

Choose pillars where audience need, credible expertise, and business relevance overlap.

Focused enough to guide decisions. Durable enough to support many formats.

LUX AUTOMATON

AUTOMATE | INNOVATE | ACCELERATE

MODULE 01 | LESSON 01 | 9 MIN

01

CHOOSE THE THREE CONVERSATIONS YOUR BRAND SHOULD OWN

Separate durable content pillars from random topics and formats, then choose three conversations that connect audience needs, founder credibility, and business relevance.

LEARNER OUTPUT

A three-pillar Content Strategy Card with purpose, audience need, business bridge, proof sources, and boundaries for each pillar.

DEFINE YOUR CONTENT PILLARS

01

Pillar, topic, format, or campaign?

Choose a durable conversation, not a temporary container.

CONTENT PILLAR

A recurring conversation your audience needs and your business can credibly lead.

TOPIC

One specific subject inside a pillar.

FORMAT

The delivery container: post, video, email, podcast, workshop.

CAMPAIGN

A time-bound push with a start, goal, and end.

Test every pillar for audience pull + credible depth + business bridge.

Complete the LANA Pillar Fit Map

Select three conversations and define what each includes and excludes.

1. Write the audience you want to help and the result they are trying to achieve.
2. List ten recurring questions, frustrations, decisions, or misconceptions you hear from that audience.
3. Group the items into three meaningful conversations rather than formats or platforms.
4. Score each conversation for audience pull, credible depth, and business bridge on a 1-5 scale.
5. Name the three strongest pillars and write one sentence describing what each includes and excludes.

DELIVERABLE

A three-pillar Content Strategy Card with purpose, audience need, business bridge, proof sources, and boundaries for each pillar.

02

BUILD AN EVIDENCE-RICH IDEA BANK

Turn each pillar into a repeatable bank of questions, stories, proof, teaching points, and calls to action so weekly publishing does not begin from zero.

LEARNER OUTPUT

A 15-idea bank with source, reader shift, call to action, and publication status for every idea.

DEFINE YOUR CONTENT PILLARS

02

Build a 3 × 5 evidence-rich idea bank

Every idea keeps its source, reader shift, and publication status.

Question

Friction

Framework

Proof

Perspective

× 3 PILLARS

**Approved source or
summary**

Reader shift

Possible next action

**Approved / verify /
private**

Select one source-backed anchor idea for the rest of the workshop.

CREATE A WEEKLY PUBLISHING RHYTHM

A realistic weekly rhythm and one-source production flow with owners, statuses, and deadlines.

FACILITATOR FOCUS

Make publishing capacity, roles, and next actions visible.

03

GIVE EVERY PUBLISHING DAY A JOB

Design a sustainable weekly rhythm in which each touchpoint performs a distinct role: teach, prove, converse, invite, or deepen the relationship.

LEARNER OUTPUT

A weekly publishing rhythm with distinct roles, realistic timing, and a documented minimum viable week.

CREATE A WEEKLY PUBLISHING RHYTHM

03

Give every touchpoint a job

Balance value, proof, conversation, invitation, and depth.

01

TEACH

Explain a useful idea or method.

02

PROVE

Show evidence, a case, or a real example.

03

CONVERSE

Invite response and learn from the audience.

04

INVITE

Offer a relevant next step.

05

DEEPEN

Add context through email, video, or a longer format.

MINIMUM VIABLE WEEK

Define what stays live when workload, approvals, or capacity tighten.

Map the weekly publishing rhythm

Work backward from publish date to draft, review, and approval.

- Choose a realistic three-, four-, or five-touch week.
- Name the pillar and strategic job for each touchpoint.
- Assign owner, reviewer, approval due date, and publish date.
- Leave a buffer for revision or delayed approval.

DELIVERABLE: weekly rhythm + minimum viable week

04 BUILD THE ONE-SOURCE PRODUCTION FLOW

Connect source notes, drafting, review, scheduling, publication, and repurposing through one visible board so the team knows what is next.

LEARNER OUTPUT

A one-source weekly production board with status, owner, reviewer, deadlines, current file, next action, and learning field.

CREATE A WEEKLY PUBLISHING RHYTHM

04

Build the one-source production flow

A board should show where the asset is, who owns it, and what happens next.

Required fields: source • owner • reviewer • deadline • current file • next action • learning

Create the weekly command board

Move the anchor through the first three statuses and assign the next action.

1. Draw the stages an asset follows from captured source to published archive.
2. Choose a short set of unambiguous status labels.
3. Define the required fields for every content record.
4. Assign an owner, reviewer, approval deadline, and next action to the selected anchor idea.
5. Add a post-publication learning field that feeds the idea bank.

ASSET	STATUS	OWNER	REVIEWER	NEXT ACTION
Anchor post	Drafting	Founder	LANA	Add proof
Short video	Captured	Founder	LANA	Translate
Email	Captured	Founder	LANA	Deepen

One current file. One owner. One next action.

DRAFT WITHOUT SOUNDING GENERIC

A reusable voice card, a SIGNAL draft brief, and one specific anchor post.

FACILITATOR FOCUS

Capture voice, source, reader, grounding, action, and limits.

05

CAPTURE THE VOICE BEFORE YOU PROMPT

Identify the language, perspective, rhythm, evidence, and boundaries that make the founder recognizable before asking AI to draft.

LEARNER OUTPUT

A reusable Voice Card containing perspective, language, rhythm, evidence, reader relationship, signature patterns, banned language, and

DRAFT WITHOUT SOUNDING GENERIC

LUX AUTOMATON

05

Capture the voice before you prompt

Use observable writing behaviors instead of vague personality adjectives.

PERSPECTIVE

How do you interpret the problem?

LANGUAGE

What words and phrases feel natural?

RHYTHM

How do sentences and explanations move?

EVIDENCE

What examples or proof do you rely on?

RELATIONSHIP

How do you address the reader?

BOUNDARIES

What must never be invented or exposed?

Voice rules must be specific enough that another writer can follow them.

Build the LANA Voice Card

Extract patterns from two natural writing or speaking samples.

1. Collect two examples of writing or speaking that sound natural and credible.
2. Highlight perspective, language, rhythm, evidence, relationship, and boundaries.
3. Write five observable voice rules rather than vague adjectives.
4. Add three signature phrases or sentence patterns and three phrases to avoid.
5. State what the drafting tool must do when source information is missing.

TEST SENTENCE

"AI can help businesses create better content."

Rewrite it with:

- Your perspective
- A concrete example
- Natural rhythm
- A clear boundary or caveat
- One reader action

06

DRAFT WITH THE LANA SIGNAL BRIEF

Use a six-part brief that gives a writing assistant approved source material, audience intent, grounding, natural voice, action, and limits.

LEARNER OUTPUT

A saved SIGNAL Brief, three candidate openings, and one revised anchor post linked to its approved source.

DRAFT WITHOUT SOUNDING GENERIC

06

Draft with the LANA SIGNAL Brief

Ground every draft in source, reader, evidence, voice, action, and limits.

LANA SIGNAL DRAFT BRIEF

Carry real context into the draft instead of asking AI to guess.

S

SOURCE

Approved notes, story, facts

WHAT MAY BE USED

I

INTENDED READER

Who they are + needed shift

WHO + WHY

G

GROUNDING

Evidence, example, detail

WHAT PROVES IT

N

NATURAL VOICE

Perspective, rhythm,
language

HOW IT SOUNDS

A

ACTION

Content job + reader next
step

WHAT IT SHOULD DO

L

LIMITS

Claims, privacy, length, gaps

WHAT IT MUST NOT DO

- S — Approved source
- I — Intended reader
- G — Grounding and proof
- N — Natural voice
- A — Action and reader next step
- L — Limits, claims, privacy, and format

Brief first. Draft second. Verify third.

Request three openings and an outline before the full draft.

AI may help draft. The human owns the source, decision, verification, and final approval.

REVIEW AND APPROVE

An approved anchor post and a documented review-and-approval operating procedure.

FACILITATOR FOCUS

Separate editorial review from approval and risk decisions.

07

RUN THE LANA CLEAR EDITORIAL REVIEW

Review the anchor draft through five separate passes: Correct, Legible, Evidence-backed, Aligned, and Responsible.

LEARNER OUTPUT

An approval-ready anchor post with a completed CLEAR checklist and documented reviewer decision.

HUMAN APPROVAL REQUIRED

AI may draft. A person decides what is published.

C

Correct

Names, numbers, dates, links, source
match.

L

Legible

Opening, flow, structure, format, next
step.

E

Evidence-backed Claims supported; examples labeled.

A

Aligned

Pillar, audience, content job, voice,
offer.

R

Responsible

Privacy, rights, access, claims,
approval.

Review the anchor in five passes

Document required changes separately from optional preferences.

1. Read the draft once without editing to identify its main idea and job.
2. Run the Correct, Legible, Evidence-backed, Aligned, and Responsible passes separately.
3. Mark each comment as required or optional.
4. Resolve required changes and recheck the source and Voice Card.
5. Record the reviewer, approval status, and date.

- ✓ **Evidence improvement** Add a specific source, example, or label.
- ✓ **Voice improvement** Replace generic wording with a Voice Card pattern.
- ✓ **Reader usefulness** Make the practical move or next step clearer.
- ✓ **Decision** Approved, revise, hold, or archive.

Record reviewer • status • date

08

CREATE THE APPROVAL LANE

Define who writes, reviews, approves, schedules, and responds, then document a lightweight operating procedure for every customer-facing asset.

LEARNER OUTPUT

A one-page approval SOP containing roles, risk levels, deadlines, reapproval triggers, and post-publication checks.

REVIEW AND APPROVE

4. ORGANIZE
TASK LIST
Clear owners
& deadlines

NEXT MOVE VISIBLE

08

Create the approval lane

Roles and risk levels make publication decisions visible.

Source owner

Writer

Reviewer

Approver

Publisher

Response owner

Risk levels

STANDARD

Routine teaching, approved source.

SENSITIVE

Customer, legal, health, finance, claims, privacy.

URGENT

Time-sensitive correction or response.

Write the one-page Approval Lane SOP

Define deadlines, reapproval triggers, and the correction path.

1. Name the source owner, writer, reviewer, approver, publisher, and response owner for your current team.
2. Define standard, sensitive, and urgent content categories.
3. Set the normal review window and publication cutoff.
4. List material changes that require reapproval.
5. Write the post-publication check and correction process.

WHO	Named roles + backup approver
WHAT	Standard, sensitive, and urgent categories
WHEN	Review windows + publication cutoff
REAPPROVAL	Material changes that reopen approval
AFTER	Post-publish check + correction / pause process

REPURPOSE INTO VIDEO AND EMAIL

A short-form video script, an email draft, and a one-to-many repurposing map.

FACILITATOR FOCUS

Translate one approved insight for video and email.

09

TRANSLATE THE ANCHOR INTO SHORT-FORM VIDEO

Adapt the approved anchor idea into a spoken, visual 45-90 second video rather than reading the written post word for word.

LEARNER OUTPUT

An approved short-form video script, shot list, caption plan, and link to the parent anchor asset.

09 Translate the anchor into short-form video

Preserve the idea; change the delivery for spoken and visual attention.

Read aloud. Time it. Cut anything that sounds written instead of spoken.

Create the 45–90 second video plan

Write the script, shot list, caption plan, and approval check.

1. Write the one idea the viewer should remember.
2. Draft Hook, Tension, Insight, Proof, and Next Step in spoken language.
3. Read the script aloud and cut anything that sounds written rather than spoken.
4. Create a three-to-five-shot plan and caption requirement.
5. Apply the relevant CLEAR checks before recording or publishing.

REVIEW
NEXT ACTION

10

Deepen the idea in email

Use the inbox for context, reflection, and a direct relationship with the reader.

SUBJECT

Accurate before clever.

PREVIEW

Support the promise.

OPENING

Create a close reader connection.

ONE IDEA

Stay focused.

STORY / PROOF

Add evidence or lived detail.

PRACTICAL MOVE

Give the reader something to do.

CTA

Invite one relevant next step.

P.S.

Optional human afterthought.

Email should deepen the approved insight, not copy the post or narrate the video.

Preserve the insight. Rebuild the delivery.

Every derivative links back to the approved parent idea.

ONE-TO-MANY TRANSLATION MAP

Preserve the insight. Rebuild the delivery for each channel.

WHAT STAYS THE SAME

- Core insight
- Approved evidence
- Audience promise
- Truth and privacy boundaries

WHAT CHANGES

- Hook and pacing
- Structure and length
- Visual or inbox context
- Channel-specific next step

Complete the email and Translation Map

Connect the post, video, email, approvals, and live file paths.

1. Choose the deeper angle the email will add to the approved anchor idea.
2. Draft the subject, preview line, opening, one idea, proof, practical move, and call to action.
3. Compare the email with the post and video to remove unnecessary repetition.
4. Run CLEAR plus the email delivery check for links, audience, sender, reply path, and mobile view.
5. Complete the repurposing map and capture future questions from replies.

PUBLIC POST**What is concise and scrollable?****SHORT VIDEO****What is spoken and visible?****EMAIL****What is deeper and relational?****OPTIONAL****What question becomes the next asset?**

Capture replies and learning back into the idea bank.

LANA One-Week Content Command Center

A ready-to-operate content system for one real week.

Build a complete, ready-to-operate content system for one week. The system must begin with approved source material, preserve the founder's voice, show who reviews and approves every asset, and translate one central insight into channel-native public content, video, and email.

CORE COMPONENTS

- Three-pillar Content Strategy Card
- 15-idea evidence bank
- Weekly publishing rhythm
- One-source command board
- LANA Voice Card
- SIGNAL Brief and approved anchor post
- Completed CLEAR review
- Approval Lane SOP
- Short-form video script and shot list
- Email draft and delivery check
- One-to-many Translation Map
- One-week learning and response plan

Is the one-week system ready to operate?

Check source, workflow, voice, approval, channel fit, and learning.

- ☐ Every content idea belongs to one pillar and names its source.
- ☐ The weekly rhythm fits actual drafting and approval capacity.
- ☐ The anchor post contains a specific perspective, example, and reader next step.
- ☐ Claims, examples, customer information, links, and rights are reviewed.
- ☐ A named human approves each customer-facing asset.
- ☐ The video sounds natural when read aloud and includes a caption plan.
- ☐ The email adds value beyond the public post and has tested delivery details.
- ☐ All derivatives link to the approved parent idea.
- ☐ The command board shows the current status and next action for every asset.
- ☐ Audience replies and learning have a documented return path to the idea bank.

Twenty points to launch-ready

Score 17–20 ready; 13–16 revise then launch; 0–12 rebuild key elements.

Pillar strategy and idea quality**4 PTS**

Three focused pillars with useful boundaries, approved proof sources, and a strong 15-idea bank.

Weekly operating system**4 PTS**

Realistic rhythm, visible statuses, owners, deadlines, next actions, and learning loop.

Voice and drafting quality**4 PTS**

Voice Card and SIGNAL produce a specific, evidence-rich anchor draft that sounds natural.

Review, approval, and responsibility**4 PTS**

CLEAR review, risk levels, permissions, approval, rights, privacy, and accuracy are documented.

Channel translation and readiness**4 PTS**

Video and email are channel-native, linked to the parent idea, approved, and ready for production or scheduling.

Thirty minutes to finish and schedule

Use the extra time for build, peer review, and next actions.

0–10 MIN

Complete missing fields and files.

10–20 MIN

Peer review with CLEAR + approval lane.

20–25 MIN

Schedule, assign, or prepare production.

25–30 MIN

Name the first audience signal to capture.

Before leaving: every asset has an owner, due date, current file, approval state, and next action.

LUX AUTOMATON

AUTOMATE | INNOVATE | ACCELERATE

LANA WORKSHOP

BUILD YOUR CONTENT COMMAND CENTER

Plan one week. Keep your voice. Approve with confidence. Repurpose everywhere.

LUX AUTOMATON

YOUR NEXT WEEK IS NOW VISIBLE.

One source. One rhythm. Human approval. Channel-native execution.
