HOW TO USE THIS WORKBOOK

Build as You Learn

Complete the pages in order. Every worksheet becomes part of your final one-week Content Command Center. Use real, approved source material whenever possible. Mark anything private or unverified before using a writing assistant.

BRING WITH YOU

- Laptop or tablet with a writing tool
- Three recent customer questions, calls, or project notes
- Two examples of content that sound like the learner at their best
- One current offer, service, product, or topic to promote
- Calendar or scheduling view

KEEP VISIBLE

- Your audience and offer
- Your best writing samples
- Privacy and approval rules
- The current source note
- The next action for every asset

FINAL BUILD

A complete one-week Content Command Center containing a three-pillar strategy, a 15-idea bank, a weekly publishing board, one approved anchor post, a short-form video script, an email draft, and a documented review and approval workflow.

01

DEFINE YOUR CONTENT PILLARS

Choose three durable conversations and build a 15-idea bank.

Worksheet 1: Audience and Business Bridge

Write the strategic context your pillars must serve.

Audience I want to help:

The result or change they want:

My offer, service, or expertise:

Why I have credible experience in this area:

What I do not want the brand to be known for:

LEARNING GOALS

- ✓ Define three durable content pillars tied to audience needs and business goals.
- ✓ Build a realistic weekly publishing rhythm with a clear job for each content touchpoint.
- ✓ Create specific, evidence-rich drafts that retain the founder's natural voice.
- ✓ Apply a repeatable human review and approval process before publication.
- ✓ Translate one approved idea into a short-form video and an email without simple copy-and-paste repetition.

WHAT YOU WILL BUILD

- ✓ Three focused content pillars
- ✓ 15 evidence-rich ideas
- ✓ Weekly publishing rhythm
- ✓ Approved anchor post
- ✓ Short-form video script
- ✓ Email draft + delivery check
- ✓ Review and approval SOP

FINAL PROJECT

LANA ONE-WEEK CONTENT COMMAND CENTER

Build a complete, ready-to-operate content system for one week. The system must begin with approved source material, preserve the founder's voice, show who reviews and approves every asset, and translate one central insight into channel-native public content, video, and email.

06

FINAL PROJECT

Assemble the LANA One-Week Content Command Center.

LANA One-Week Content Command Center

Build a complete, ready-to-operate content system for one week. The system must begin with approved source material, preserve the founder's voice, show who reviews and approves every asset, and translate one central insight into channel-native public content, video, and email.

Assembly checklist

- ☐ Three-pillar Content Strategy Card
- ☐ 15-idea evidence bank
- ☐ Weekly publishing rhythm
- ☐ One-source command board
- ☐ LANA Voice Card
- ☐ SIGNAL Brief and approved anchor post
- ☐ Completed CLEAR review
- ☐ Approval Lane SOP
- ☐ Short-form video script and shot list
- ☐ Email draft and delivery check
- ☐ One-to-many Translation Map
- ☐ One-week learning and response plan

Launch readiness checklist

- ☐ Every content idea belongs to one pillar and names its source.
- ☐ The weekly rhythm fits actual drafting and approval capacity.
- ☐ The anchor post contains a specific perspective, example, and reader next step.
- ☐ Claims, examples, customer information, links, and rights are reviewed.
- ☐ A named human approves each customer-facing asset.
- ☐ The video sounds natural when read aloud and includes a caption plan.
- ☐ The email adds value beyond the public post and has tested delivery details.
- ☐ All derivatives link to the approved parent idea.
- ☐ The command board shows the current status and next action for every asset.
- ☐ Audience replies and learning have a documented return path to the idea bank.

Weekly operating system	4	_____
Voice and drafting quality	4	_____
Review, approval, and responsibility	4	_____
Channel translation and readiness	4	_____

Reflection

Which pillar gives you the clearest combination of audience need, evidence, and business relevance?

Which part of your current process creates the most avoidable delay or generic writing?

What source material do you need to capture more consistently?

Which approval risk deserves a stronger rule before you publish more frequently?

What did the video or email reveal that was not obvious in the original post?

What audience signal will you use to improve next week's command center?

ADVANCED CHALLENGE

Expand the one-week command center into a four-week editorial cycle. Assign one anchor per week, create a proof library, define standard and sensitive approval lanes, and map responsible automations for source capture, reminders, scheduling, transcription, and archive while keeping human approval before publication.
