

AI UGC Studio: Build Realistic AI Creator Videos Without Writing Prompts

Lux Automaton Creator Lab

WORKSHOP OVERVIEW

Audience:

Entrepreneurs, creators, agencies, marketing teams, ecommerce brands, and SaaS companies.

Level:

Beginner to Intermediate

Duration:

120 minutes

Final Project:

Build Your First AI UGC Advertisement System.

LEARNING OUTCOMES

Students will create:

- AI creator identity
- Character Bible
- Product Story Card
- Scene Blueprint
- UGC Script
- Master Prompt
- Video Production Plan
- 30-Day Content Factory Plan

CURRICULUM

MODULE 1: Understanding AI UGC Systems

Lesson 1: Why AI UGC Works

Students learn why creator-style content builds trust and how repeatable systems scale production.

Lesson 2: Building the AI UGC Pipeline

Idea → Audience → Creator → Product → Scene → Script → Prompt → Video → Distribution.

MODULE 2: Create Your AI Creator

Lesson 3: Character DNA

Create identity, personality, appearance, and voice guidelines.

Lesson 4: Character Consistency System

Build reusable references including portrait, full-body, and style documentation.

MODULE 3: Product + Scene Development

Lesson 5: Product Story

Define audience, problem, benefit, and usage moment.

Lesson 6: Scene Builder

Design location, lighting, camera, emotion, and action.

MODULE 4: Script Engineering

Lesson 7: UGC Script Formula

Hook, Experience, Result, Call To Action.

Lesson 8: Human Voice Writing

Remove robotic marketing language and create authentic creator storytelling.

MODULE 5: Master Prompt Production

Lesson 9: Master Prompt Builder

Combine character, product, scene, script, and camera direction.

Lesson 10: AI Content Factory

Turn one concept into multiple videos and campaigns.

FINAL PROJECT

Build a complete AI UGC advertisement package.

Deliverables:

- Creator Profile
- Character Bible
- Product Story
- Scene Blueprint
- Script
- Master Prompt
- Content Calendar

QUALITY RUBRIC

Character Quality: 25%

Story Quality: 25%

Prompt Quality: 25%
